

FirstRound ? Interview Report

Sieda Khan ?

Interview date: 2026-08-14 · Duration: 7m 36s · Transcript turns: 34

Overall: 1.8/5 ? no_hire

The candidate demonstrated limited technical communication, was unable to address debugging and shipping scenarios, and provided vague or incomplete answers to most questions, indicating they are not yet ready for the Junior AI Engineer role.

Competency	Score	Confidence	Evidence quote	Reasoning
Communication	2	0.60	embedding and all of the thing and giving	The candidate was not able to explain security and how to maintain
Debugging	1	0.90	?? ???? ?? ????? ?? ????????? ?? ??	Directly admits not knowing how to address the debugging s
Problem decomposition	2	0.50	king the chunking which I used were ma	Attempts to describe chunking strategies but the explanation
Shipping ability	1	0.80	Okay you are asking too much questions	Not able to discuss any of shipping or prioritization process features
Technical depth	3	0.60	So it's basically the vector DB	Shows awareness of using a vector database for retrieval, in

Strengths

- Mentioned security considerations when limiting AI context: "embedding and all of the thing and giving the user only what it want and it requires so that we maintain the security and we give the AI the context which is necessary."
- Identified use of a vector database for retrieval: "So it's basically the vector DB"

Concerns

- Provides incoherent or fragmented explanations, making it hard to assess understanding
- Unable to propose systematic debugging steps: "?? ???? ?? ????? ?? ????????? ?? ?? ?? ???? ?? ??"
- Did not discuss shipping or prioritization strategies
- Answers often off?topic or incomplete, showing weak problem decomposition

GitHub-grounded questions asked: 3
